Payment Made?

Click the button below to notify us via WhatsApp

We'll confirm your payment and arrange delivery

Recommended Technology Stack

React (vite) + Node.js

Why This Stack?

Full Control & Flexibility

Custom payment flow and WhatsApp integration exactly as you want it

Modern & Fast

Lightning-fast page loads and smooth user experience

Easy to Scale

Add new features, product categories, and payment methods anytime

Mobile-Friendly

Perfect on phones, tablets, and desktops

Your Developer Knows It

Faster development with familiar technology

Other Options (Not Recommended)

WordPress + WooCommerce

Pros: Quick setup, many plugins

Cons: Hard to customize payment popup, less flexible

C# ASP.NET MVC

Pros: Enterprise-grade, powerful

Cons: Too complex for this project, slower development

Plain HTML + JavaScript

Pros: Simple, lightweight

Cons: Hard to maintain as site grows, no modern features

Tech Stack Details:

React, TypeScript, Node.js, Tailwind CSS

Database: PostgreSQL or MongoDB

Project Timeline & Next Steps

Development Timeline

Week 1-2

Design & Planning

Mockups, database design, project setup

Week 3-4

Core Development

Product catalog, cart, payment system

Week 5-6
